Programmed Timber

PT Pine Battens

At Programmed Timber, we understand that the building industry demands quality products that are reliable, cost-effective and of a consistent grade. That's why we're proud to offer our new range of PT Pine Battens.

Our PT Pine Battens are produced from high-quality, sustainably sourced Australian Radiata Pine and are the only batten in Australia that are graded using state-of-the-art automated grading systems to produce a superior end product.

We offer a standard range of sizes as well as being able to cater for any specific requirements you may have. While our production capability ensures your building project is completed to the highest standards of quality and reliability.

At Programmed Timber, we are committed to providing our customers with the highest standards of quality and service. Our PT Battens are produced from pre-graded feedstock to ensure a straight, consistent and reliable product with minimal waste. The PT Battens are also packaged to make handling easier at the jobsite.

Programmed Timber is dedicated to working with our customers to develop long term supply relationships through all market cycles. We provide exceptional customer service, quality of product and reliable on-time delivery. By choosing Programmed Timbers as your supply partner you are investing in securing your long-term feed stock needs.
